7

Open requests by age

Staff up for heat complaints before winter

Heat and hot water complaints rise from about 4,000 in September to about 80,000 in January, roughly 20 times more. Housing Preservation (HPD) handles them and already closes only about 6 in 10 requests within 7 days. Schedule extra inspectors from October to February.

Find out why Manhattan is slowest

Manhattan requests take about 8 days to close, against about 6 in Staten Island and Queens, even though Brooklyn files the most. Break Manhattan's delays down by agency and complaint type to see whether one team is driving the gap.

Plan for the March pothole spike

Street and sidewalk complaints doubled in March 2026, from about 25,000 a month to 49,000, as winter damage appeared. Moving Transportation (DOT) crews and budget ahead of the thaw would meet that wave instead of chasing it.

Clear the oldest open requests first

Half of the 209,000 open requests are more than 90 days old. Most sit with four agencies: Parks (26,000), HPD (20,000), Taxi & Limousine (16,000) and Transportation (13,000). A 90-day review to close or re-assign them would shrink the backlog fastest.
